

ANNOUNCEMENT

Registration of SAAP and Targets Achieved by SAAP Executive Council (2025-2026)

Prof. Dr. Samina Malik

President, SAAP

Head, Department of Physiology

University College of Medicine and Dentistry

The University of Lahore, Lahore, Pakistan

On behalf of the SAAP EC (2025-2026), we are humbled to announce that SAAP has been registered in this term as a society under registrar of companies at Sri Lanka. This was a long effort since its inception. All previous ECs played their pivotal role to achieve this success. In the future, SAAP can develop its own Ethical Review Board for Collaborative Research. It has already become a South Asian Centre of Excellence in Physiology Education and Research (SACE-ER) with its YouTube channel through the joint platforms of the Education Subcommittee and Research and Publication Subcommittee. An E-book is in dissemination to approach research supervisors and educational mentors across the SAAP member societies. Also, the Undergraduate Wing of SAAP has been established in this term to continue the legacy of adopting the passion for Physiology by the future doctors. The next Biennial Conference is returning to the Bangladesh Society of Physiologists (BSP) after 14 years, by empowering physiologists of BSP for inclusivity. Lastly, there is a closer alignment of SAAP now with other global Physiological Societies, especially the introduction of travel grants for SAAP Biennial Conferences by FAOPS and invitation of BGA membership from SAAP member societies and organization of international workshops from collaborative platforms of Physiological Societies.
